1. Claims 1-16 are present in this instant application.

2. Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specific microorganism, does not reasonably provide enablement for broad scope as demonstrated by U.S. 6,537,344 which does not form an immobilized nano component. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

In addition, one would not be enabled to make and use the inventions absent a showing that the claimed *Verticillium* (AAT-TS-4) is known and available to the U.S. public without restrictions. This application **may** be considered to be **FATALLY DEFECTIVE** absent a reasonable showing to the above. The next office action will be made final. No new matter may be entered into this application.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 recites the limitation "the *Verticillium* (AAT-TS-4)" but there is insufficient antecedent basis for this limitation in claim 1,

4. **No claim is allowed.**

Art Unit: 1651

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
